

Back-lit Panel Light

Unique integrated design with invisible maintainable
function

Ultrathin Back-lit Panel

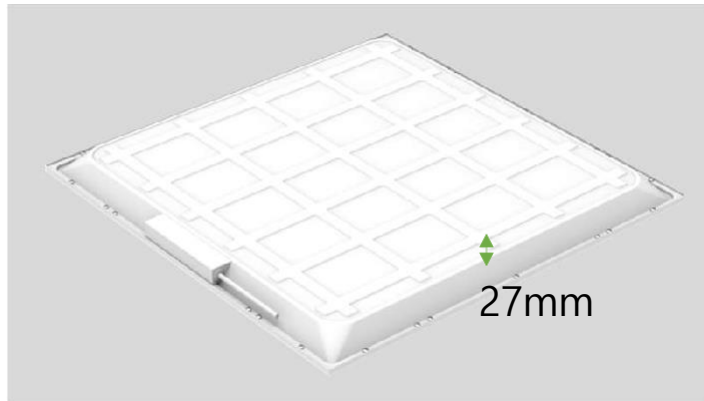

Ultrathin Back-lit Panel provides efficient and optimal light comfort.

Benefit

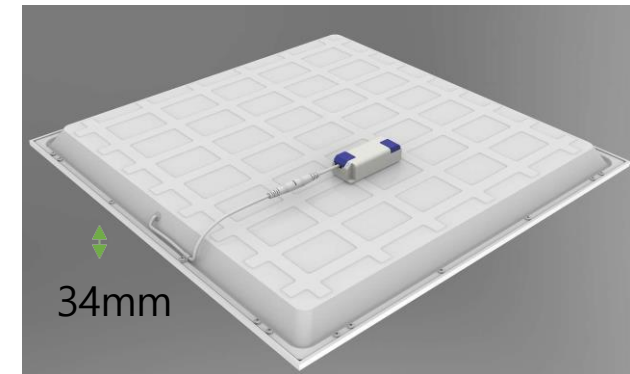

Loading quantity increase more than **400-600pcs**, saving loading rate up to **42%**

27mm Panel with driver

VS

34mm Panel without driver

Size	27x595x595mm	34x595x595mm
20GP(pcs)	2000pcs	1404pcs
40HQ(pcs)	4300pcs	3888pcs

Innovation on driver design

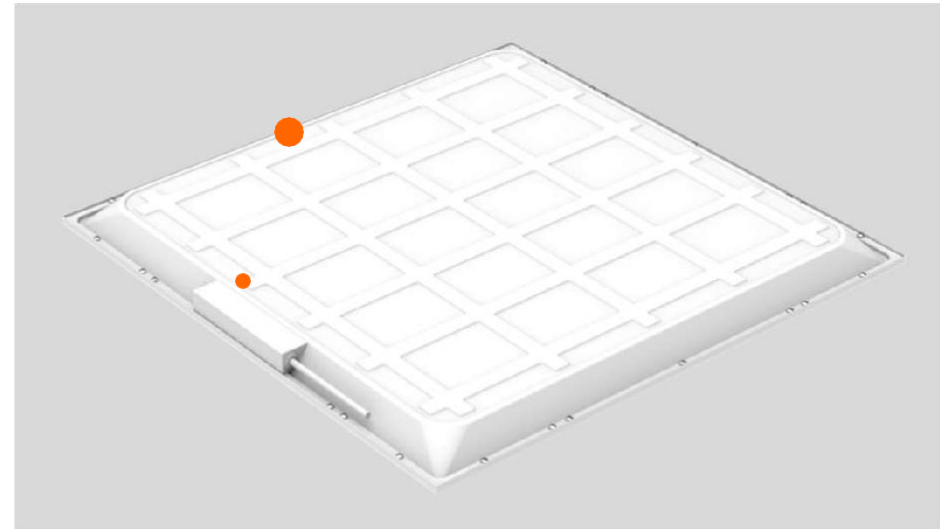

There are several trends are driving the development of LED lighting market.

- Contentious improvement for high-brightness LEDs,
- Contentious improvement for high efficiency high reliability of LED driver power supply.

Non-isolated driver occupy more and more markets at the low power supply.

Because of:

- Higher power efficiency
- Better cost performance
- Lower heat dissipation, small volume
- Safety and more protection by the physical design

Minimal -to-install- V1

Integrated driver & cable – 1 time installation, on/off version, high cost competitive

Specification

- Super thin design, plate height lower down to 25mm, help you save more than 80% of storage space and stocking funds.
- High efficiency to 170lm/W for optional
- Function optional: Multi color/ Multi lumen, Sensor, 0-10V/DALI dimmable
- Long life time up to 50000hrs

Back-lit Panel light, 173lm/W

595x595mm	PVPL-6060-22W	22W	3800lm	4000K	UGR < 22, PF > 0.9	Flicker free
